TEKNIK INFORMATIKA TAHUN 2025/2026

1. Masuk php myadmin lalu pilih database yang ingin di backup

2. Pilih export, kemudian masukan nama backup file kemudian selesaikan

3. Pilih file backup, lalu sisipkan di folder yang diinginkan

The image shows two screenshots. The top screenshot is a Windows File Explorer window titled 'localhost wants to save'. The address bar shows the path '<< Documents > TI 2A > Basis data'. The left sidebar shows the 'Basis data' folder selected. The main pane is empty with the message 'No items match your search.' The bottom screenshot is a SQL query editor window titled 'Server: 127.0.0.1 > Database: tokokomp_baim'. It contains a SQL query to create a trigger. Below the query editor are three buttons: 'Bersihkan', 'Format', and 'Get auto-saved query'.

localhost wants to save

<< Documents > TI 2A > Basis data

Search Basis data

Organize New folder

No items match your search.

Server: 127.0.0.1 Database: tokokomp_baim

Jalankan perintah SQL pada basis data tokokomp_baim:

```
1 DELIMITER $$
2
3 CREATE TRIGGER trg_transaksi_insert
4 BEFORE INSERT ON transaksi
5 FOR EACH ROW
6 BEGIN
7     IF NEW.total_harga < 0 THEN
8         SIGNAL SQLSTATE '45000'
9         SET MESSAGE_TEXT = 'Total harga tidak boleh negatif';
10    END IF;
11 END $$
12
13 DELIMITER ;
```

Bersihkan Format Get auto-saved query

- 4.

The image shows a SQL query editor window titled 'Run SQL query/queries on table tokokomp_baim.kategori_backup:'. It contains a SQL query to create a procedure. The query is as follows:

```
1 DELIMITER //
2
3 CREATE PROCEDURE sp_kategori_backup()
4 BEGIN
5 SELECT * FROM kategori;
6 END //
7
8 DELIMITER ;
```

```
1 CALL sp_kategori_backup();
```
